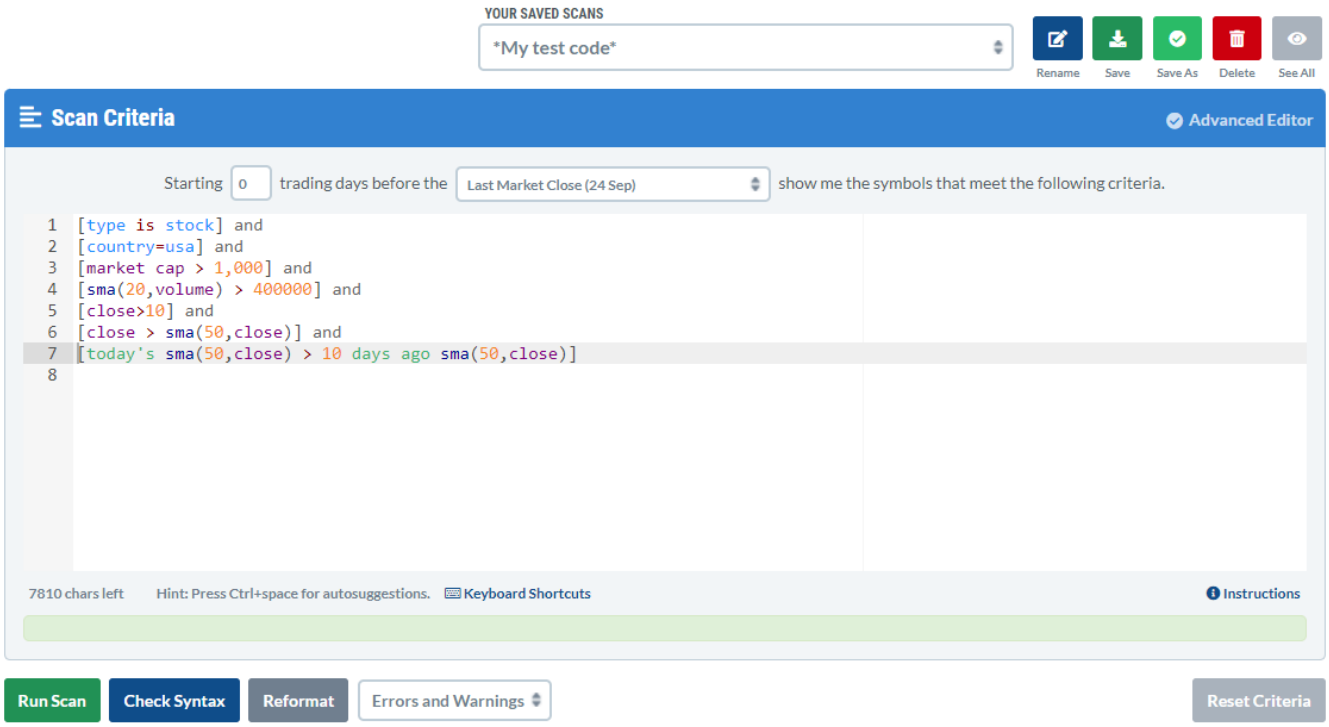
Section: How to use Stockcharts.com to find trading setups

Introduction to StockCharts.com scans.

Because we look for trending stocks we need to add a condition that would check if the 50 Day Moving average is sloped upward:

Code 2:

```
[type is stock] and
[country=usa] and
[market cap > 1,000] and
[sma(20,volume) > 400000] and
[close>10] and
[close > sma(50,close)] and
[today's sma(50,close) > 10 days ago sma(50,close)]
```


Lets copy the code and paste it into the window for the Scan criteria on the page [Technical Scan Workbench | StockCharts.com]():
